CIMCORP

Passion for optimized material flow

CIMCORP

**Is there a formula
for success?**

Choose peace of mind

Aiming for zero downtime? Looking to avoid risks? Want to secure your supply chain? With Cimcorp's world-class, fast and easy service you'll succeed now and in the future.

Uptime services

Want to ensure 100% uptime in your facility? Choose us to keep it going.

Select the right service level, with remote or on-site engineers taking care of your system. The basic level includes our 24/7 help desk and spare parts kit. Think ahead and add predictive maintenance!

Remote

On-site

Upgrade services

Longing for higher throughput or to increase SKUs? It's time to prepare for change.

Get information on the health of your system. Maintain high operational reliability in years to come and minimize maintenance costs for the future.

Upgrade

Modification

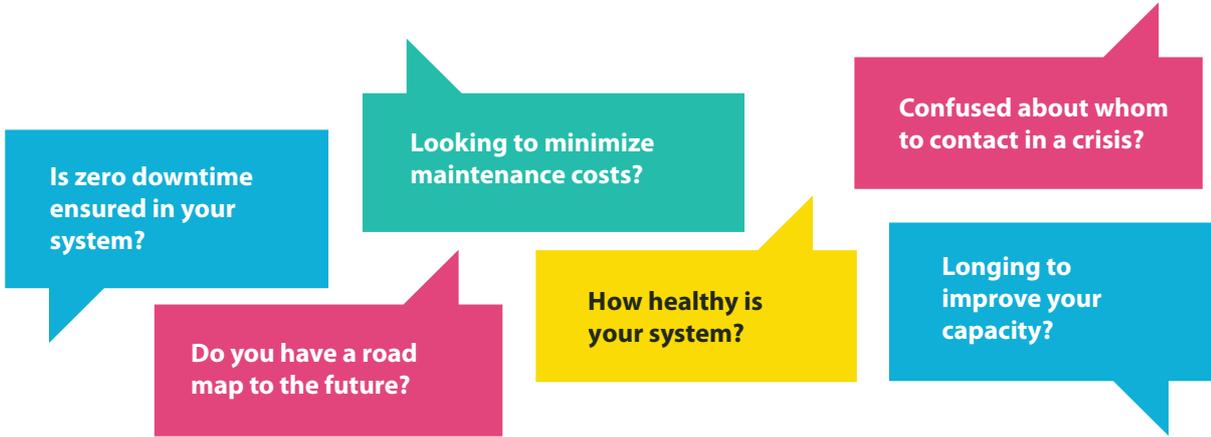

World-class experience

We have installed automated systems for manufacturers and distribution centers in over 40 countries across six continents.

These include new construction projects, as well as retrofits to automate existing warehouse operations. For retrofits, we enable clients to transform manual facilities to optimize material flow, improve efficiency and better utilize space – without having to uproot their business to keep up with changing market demands.

In each project, Cimcorp's experienced automation specialists work one-on-one with customers to evaluate their warehousing data and operations to determine the areas for automation that will generate the biggest impact at the lowest cost.

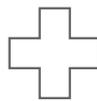

Lifecycle consulting

Looking for an optimal system? Avoid risks by expecting the unexpected.

Our experts review your current automation system to ensure the best cost-performance ratio and provide a road map for further actions.

Planning

Training

Certified spare parts

Get an initial spare parts kit for your new investment or think ahead and take care of the whole lifecycle of your system.

Spare parts are needed at some stage of the service life of the product. Cimcorp's certified spare parts help to realize the designed lifetime of all equipment and minimize maintenance costs.

Success services

Because we care.

As our customer, we offer you a single point of contact and a wide range of services suited to your needs.

Our Success Services help your personnel ensure uptime to keep your operations running smoothly and help to secure a lifecycle of 20 years or more for your automation technology.

Contact sales to see which services fit to your facility.
